

AKASH KRISHNA K A

Cybersecurity Analyst

Palakkad, Kerala, India | +91 6238040871 | akashkrishna2256@gmail.com

GitHub | LinkedIn | Portfolio

Professional Summary

Cybersecurity Analyst with hands-on experience in vulnerability assessment and penetration testing (VAPT) across web and mobile platforms. Skilled in network scanning, OWASP Top 10/MASVS methodologies, SIEM-based log monitoring, and threat detection. Proven track record identifying and documenting vulnerabilities including XML-RPC exposure, REST API enumeration, hardcoded encryption keys, clickjacking, and CORS misconfigurations. Proficient with Kali Linux and industry-standard security tools.

Technical Skills

- **Security Tools:** Nmap, Burp Suite, Nikto, Metasploit, WPScan, OWASP ZAP, MobSF, Frida, Wazuh, Suricata
- **Security Concepts:** OWASP Top 10, OWASP MASVS, Vulnerability Assessment and Penetration Testing (VAPT), XSS, CORS Misconfiguration, Clickjacking, Network Scanning, SIEM, IDS/IPS
- **Programming/Query Languages:** HTML, SQL
- **Operating Systems:** Kali Linux, Windows
- **Virtualization Platforms:** VirtualBox, Android Studio
- **Other Skills:** Linux Command Line, Basic Networking, Hardware Troubleshooting, Static and Dynamic Application Analysis

Internship Experience

Vulnerability Assessment Intern *Synnefo Solutions, Ernakulam*

Dec 2025 – Present

- Conducted vulnerability assessments on web applications using Nikto, Burp Suite, and Nmap; identified issues including clickjacking, CORS misconfiguration, and open ports/services
- Documented findings in formal reports following OWASP Top 10 guidelines; implemented Wazuh for log monitoring and threat detection

Web Application VAPT – savedate.me *Independent Security Assessment*

April 2026

- Conducted a VAPT on a WordPress site, identifying 7 findings including XML-RPC exposure and REST API user enumeration, using Nmap, Nikto, Burp Suite, OWASP ZAP, and WPScan
- Delivered a full report with evidence and remediation steps to stakeholders

Mobile Application Security Assessment – Manappuram OGL Android App, Phase 2 *Independent Security Assessment*

June 2026

- Performed static and dynamic testing on the Android application, identifying 1 high and 3 medium severity findings, including a hardcoded AES key
- Utilized apktool, jadx, MobSF, and Frida; mapped findings to CWE and OWASP MASVS v2 standards

Projects

WebSecCheck

GitHub

- Built a web security scanning tool to automate checks for common vulnerabilities and misconfigurations on target websites

Mini Alexa – AI Voice Assistant (C++)

- Developed a voice-controlled assistant with speech-to-text and text-to-speech capabilities, integrating the Gemini API for AI-powered responses
- Applied object-oriented programming principles for modular, maintainable software design

Education & Certifications

Cybersecurity Certification *Synnefo Solutions, Ernakulam*

2025 – 2026

Diploma in Computer Hardware Engineering *Government Polytechnic College, Palakkad, Kerala*

2022 – 2025

National Council for Technology and Training (NACTET) – Skill Development Certification, Govt.-Registered ATC
